THE SACRIFICE OF LIFE

Thousands of lives are sacrificed annually because

mankind are not educated in the first rudiments of hygiene and life-preservation. Simple nilments are neglected. The debility increases, and some fatal disease attacks the victim, and all life's pleasure departs, existence becomes a burden, life s trouble, and all because mankind is so spathetle and regardless of the signs nature sends that the vital strength is declining. All onses require immediate attention before it is too late, and a course of Clements Tonio invariably has the effect of immediately restoring perfect health.
